

Codex + Blueprint Factory Video Playlist

Research date: 2026-06-29

Use this for onboarding new Blueprint Factory builders. The list is intentionally current: no recommended video should be older than six months from the research date, and Codex-specific videos should skew toward the last three months whenever possible.

Hard Rules

- Prefer videos published on or after 2026-03-29.
- Allow 2025-12-29 through 2026-03-28 only when the topic is stable enough and there is no better recent replacement.
- Do not use Figma-required videos, Figma workflows, or Figma-first channels for this onboarding path.
- Re-check this file monthly. Codex changes fast enough that old tutorials can train the wrong habits.

How To Use This Playlist

Give new builders the Codex block first, then the Blueprint Factory craft block. They should watch with this repo open, not as passive homework.

After each block, they should do one small factory exercise:

- Ask Codex to explain this repo and summarize the factory rules.
- Run a Blueprint Factory status check on an existing site.
- Find a strong donor site and write a donor topology.
- Make one small visual improvement and capture before/after screenshots.

They should read these local docs alongside the videos:

- AGENTS.md
- README.md
- factory/playbooks/blueprint-factory-callbook.md
- factory/playbooks/reference-first-build.md
- factory/playbooks/green-pastures-pack.md
- factory/qa/beauty-pass-rubric.md

Core Codex Playlist

Last 90 Days

1. [Ultimate Guide To ChatGPT Codex for Everyday People](#) - Skill Leap AI, 2026-06-22
 - Good plain-English overview for new team members who are not already agent power users.
 - Watch for: how to frame tasks, review output, and stay in control.
2. [OpenAI Codex in 7 Minutes](#) - Developers Digest, 2026-06-14
 - Fast orientation before longer tutorials.
 - Watch for: the mental model of Codex as a coding agent, not an autocomplete tool.
3. [How to Use OpenAI Codex Like a Pro](#) - Love Babbar, 2026-06-09
 - Strong practical workflow video.
 - Watch for: prompting, iteration, and checking work.
4. [Introducing Sites in Codex](#) - OpenAI, 2026-06-05
 - Official, current Codex feature context.
 - Watch for: how Codex handles web/app surfaces and preview-style workflows.
5. [OpenAI Codex: Build Apps That Work For You 24/7](#) - Greg Isenberg, 2026-06-04
 - Useful for thinking beyond one-off code edits.
 - Watch for: agentic product-building habits and delegation.
6. [The Ultimate Codex Tutorial: How To Use Codex For Beginners 2026](#) - Charlie Chang, 2026-05-24
 - Good beginner-to-practical walkthrough.
 - Watch for: the full flow from task setup to review.
7. [Codex is INSANE - Everything New in 10 Minutes](#) - Tech With Tim, 2026-05-08
 - Good update-oriented overview.
 - Watch for: what changed recently and what behaviors old tutorials miss.
8. [OpenAI Codex Full Course 4 Hours: Build & Ship](#) - Aniket Panjwani, 2026-05-02
 - Use as the longer weekend video for builders who need depth.
 - Watch for: build, ship, review, and iteration loops.
9. [Codex Full Course 2026: The NEW Best AI Coding Tool](#) - Riley Brown, 2026-04-20
 - Good power-user pass after the basics.
 - Watch for: repeated task loops and practical agent workflow.
10. [CODEX FULL COURSE: From Zero to Deployed App](#) - David Ondrej, 2026-04-11
 - Useful for seeing a fuller product path.
 - Watch for: scope control, deployment thinking, and end-to-end proof.

11. [OpenAI Codex Full Tutorial in 2026 | using Codex from Scratch](#) - Arsh Goyal, 2026-03-29

- Boundary item: exactly at the 90-day preference line.
- Watch for: the beginner setup flow and what to skip once they are comfortable.

Still Current, But Older Than 90 Days

12. [How PMs use the Codex app](#) - OpenAI, 2026-02-09

- Official Codex app workflow for non-engineering task framing.
- Watch for: using Codex to turn product intent into concrete work.

13. [Multitasking with the Codex app](#) - OpenAI, 2026-02-06

- Still inside the six-month window and useful for team workflow.
- Watch for: parallel work, task boundaries, and review checkpoints.

14. [Automate tasks with the Codex app](#) - OpenAI, 2026-02-03

- Use for understanding Codex beyond manual coding.
- Watch for: repeatable task delegation and follow-through.

Blueprint Factory Craft Playlist

These are for the kind of sites this factory builds: donor-first, high-craft, animated, responsive, and shipped from code. None of these should be used as a Figma workflow.

Design Judgment And Donor Analysis

1. [Design trends that kill sales](#) - Malewicz, 2026-06-23

- Strong critique training for avoiding pretty-but-weak pages.
- Watch for: which visual trends hurt clarity, trust, and conversion.

2. [6 EASY Tips to 10x Any Site's Design](#) - Self-Made Web Designer, 2026-03-05

- Slightly older than 90 days, but inside six months and directly useful.
- Watch for: fast layout and polish checks that map to Beauty Pass.

3. [Web Design Trends 2026](#) - Tilda, 2025-12-30

- Boundary item: keep only while it remains inside the six-month rule.
- Watch for: current visual language and what to borrow from references.

Next.js, Tailwind, And React Surfaces

4. [Next.js Tutorial for Beginners | NextJS Full Course](#) - ProgrammingKnowledge, 2026-03-24

- Good recent Next.js refresher for newer builders.
 - Watch for: app structure, routing, and page composition.
5. [Next.js Crash Course - Full Stack TypeScript, React 19, Postgres & Prisma](#) - Code with Ahsan, 2026-03-12
- Use when someone needs a fuller modern app context.
 - Watch for: TypeScript structure and full-stack boundaries.
6. [Tailwind CSS v4 Tutorial - What It Is & Why It Changed Everything](#) - Pixel Grid UI, 2026-04-25
- Best current Tailwind v4 orientation from this research pass.
 - Watch for: CSS-first configuration and what old Tailwind tutorials get wrong.
7. [Tailwind CSS v4 for Beginners | Full Course 2026](#) - Coder Coder, 2026-03-14
- Practical foundation for the styling layer.
 - Watch for: utility composition and responsive layout.
8. [Build a landing page using React, TypeScript, Tailwind CSS and Motion](#) - keen coding, 2026-06-06
- Directly maps to Blueprint Factory page-building work.
 - Watch for: code-first landing page structure and small motion details.

Motion And Signature Moments

9. [GSAP Full Course | Beginner to Advanced + Animated Website Project](#) - APPROX Coding, 2026-03-31
- Best recent GSAP full-course candidate from this pass.
 - Watch for: timelines, sequencing, and how a signature moment is built.
10. [Build a Stunning Animated Carousel in React](#) - Works on my machine, 2026-03-27
- Near the 90-day line, useful for component-level motion.
 - Watch for: interaction states and motion restraint.
11. [Build Scroll-Controlled Text Animations with GSAP ScrollTrigger in React](#) - CodeRef, 2026-02-22
- Older than 90 days, still inside six months and relevant to scroll-heavy sites.
 - Watch for: scroll timing, text reveals, and React integration.
12. [How to build a stacking card effect on scroll in React](#) - xplodivity, 2026-01-31
- Older than 90 days, still inside six months.
 - Watch for: section rhythm and card choreography.

Channels To Watch

Use these channels as discovery feeds, not as permission to watch stale videos. Sort by newest first and keep the same six-month rule.

Codex And Agent Work

- [OpenAI Developers / Codex videos](#)
- [OpenAI Codex docs](#)
- [Developers Digest](#)
- [Riley Brown](#)
- [Tech With Tim](#)
- [Skill Leap AI](#)

Code-First Web Craft

- [JavaScript Mastery](#)
- [PedroTech](#)
- [Coder Coder](#)
- [Pixel Grid UI](#)
- [GSAP Learning](#)
- [Malewicz](#)
- [Self-Made Web Designer](#)

Non-YouTube Reference Feed

- [Codrops](#)
- Keep this because Blueprint Factory needs creative frontend references. Use it for reference analysis, animation patterns, and visual ideas, not as a Figma workflow.

Blueprint Factory Training Prompt

After the playlist, give each new builder this prompt inside the repo:

Read AGENTS.md, README.md, factory/playbooks/blueprint-factory-callbook.md, factory/playbooks/reference-first-build.md, and factory/qa/beauty-pass-rubric.md.

Then explain the Blueprint Factory workflow to me as a checklist:

1. How to start a normal high-craft website.
2. How donor-first cloning works.
3. What files every site must have.
4. What proof is required before a site is ready.
5. What you must ask before deploying or making major art-direction changes.

Then give them this practical exercise:

Pick one existing site under sites/.
Inspect the current factory state.

Find the next missing gate.
Do not edit yet.
Tell me the smallest useful next action and what proof you would collect.

What Good Looks Like

A trained builder should be able to say:

- Codex needs clear task boundaries, repo context, and verification.
- Blueprint Factory starts with a visual donor, not blank-page invention.
- The first pass clones structure and craft; the second pass translates brand, copy, assets, and goals.
- We do not use Figma as part of this factory onboarding path.
- Every site needs brief, art direction, asset log, deploy notes, screenshots, and visual review.
- Animation matters only when it supports the signature moment.
- A task is not done until the build, screenshots, motion evidence, and Beauty Pass prove it.
